

Assessment Policy 2018

Monitoring and revision of the policy

This policy was first developed during the school year 2018 by the MYP coordinator and consulted via staff bulletin with Mount Eliza SC's teaching staff. In February 2018 this policy was reviewed by the Leading Teachers and Principals of school. It has been reviewed in January 2019 for further consultation. The assessment policy will be reviewed and updated in consultation with the whole staff on a bi-annual basis. Prior to the update feedback will be sought from all stakeholders of the school community. The *Programme standards and practices*, as well as the guide *MYP: From principles into practice*, were taken into account in developing the policy.

Mission statement: *Mount Eliza SC provides a high quality, academically challenging international education aligned with the International Baccalaureate. We foster within each student, staff member and community member an enduring passion for learning and empowering each individual to become a caring global citizen.*

Philosophy and principles of assessment in Mount Eliza College

At Mount Eliza Secondary College a collaborative and personalised approach supports students and staff as active learners. We work to empower students to be their best by questioning their experiences, expressing themselves with confidence and participating in local, national and global communities. We are committed to safety and wellbeing for all young people and this is the primary focus of our care and decision making.

‘Educated for excellence’ – ‘Prepared for life’

Goals of assessment:

School context Assessment is a practice that drives a common instructional practice and involves teachers, students and parents. Assessment measures student learning and informs stakeholders about an individual's areas of strength and areas that are in development. Data collated from assessment is used to identify learning targets and plan curriculum. Mount Eliza SC strives to develop assessment tasks that are authentic, that is, they are summative, specific, criterion-related, varied,

*Educated for Excellence,
Prepared for life.*

Assessment Policy 2018

use of a range of measurement tools, and have real-world applications wherever possible. All participants in the process have opportunities to assess collaboratively through self-assessment, peer-assessment, and teacher assessment. A collaborative culture enables teachers to moderate for consistency across the school. These practices develop a shared understanding of school-based expectations and the development of learning. Authentic assessment allows students to be active participants in their learning and allows teachers to account for the learning opportunities they provide for students.

General assessment philosophy:

Assessment and feedback will be generated and communicated via COMPASS.

- Students will complete at least 2 Common Assessment Tasks (CATs) per Semester, and these will be assessed against **MYP criterion**.
- Formal pre and post tests will inform the **Victorian Curriculum Assessment**, communicated at the end of each Semester, for Literacy and Numeracy.
- Students will be assessed against Learning behaviours every 5 weeks
- Students, parents and teachers will participate in Student led conferences each semester

- Assessment is on-going
- Assessment is consciously designed to measure and improve student learning.
- Reflection is an essential and integral part of assessment.
- Assessment tasks must be authentic whenever possible
- Feedback is central to the assessment process.
- Students and teachers can use feedback to revise and improve performance.
- Assessment provides a direction for teachers, the learners (students), the parents, the administration and the larger school community.
- Assessment should be sensitive to cultural, linguistic, racial, learning, physical and gender differences.
- Criteria for assessment is shared or developed with the students prior to assessment where appropriate.

Assessment Policy 2018

- Assessment is objective; all judgments are based on evidence from student work.

Aims of assessment at Mount Eliza SC:

- Provide valid and reliable measurements of what students have learned.
- Reflect student growth, development and learning.
- Identify areas of strengths and areas to be further developed.
- Provide direction for future planning and instruction.
- Develop a common language for discussing and evaluating.
- Evaluate the appropriateness of the curriculum.
- Inform academic target setting.
- Empower students to be active participants in their own learning.
- Develop shared year level and school-wide expectations and set standards.
- Create shared academic understanding in departments.
- Provide structured, focused and relevant feedback to students and parents.
- Provide information to school management to inform budgets, resources, curriculum development, appraisal and professional development.

General assessment practices in Mount Eliza SC:

1. **Pre–assessment** – All teachers will assess student’s prior knowledge and experience before embarking on new learning experiences.
2. **Formative assessment** – On-going and regular assessment will be used during the teaching and learning process to inform teachers and students about how the learning is developing. Formative assessment and teaching are directly linked. A variety of methods will be used. Teachers are expected to keep records of their formative assessments as learning Tasks on COMPASS/ManageBac
3. **Summative assessment (Common Assessment Tasks CAT)** – Summative assessment happens at the end of the teaching and learning process and is planned in advance. The assessment is designed so that students can show their understanding of concepts, knowledge and skills in authentic contexts.
4. **Internal assessment moderation** –

Assessment Policy 2018

Teams of educators are expected to moderate common assessment tasks. This process involves multiple teachers making autonomous judgments against the same samples and then coming together to establish a consensus level of achievement. This practice is designed to create agreed-upon standards between professionals across the school.

5. Assessments will be carried out in the following forms:

peer-assessment, self-assessment and teacher-assessment. Feedback should be provided within an appropriate amount of time, and never longer than a 'Learning Behaviour Report' cycle.

6. A balance of strategies will be used at developmentally appropriate levels and should be outlined in planning documentation.

7. A balance of assessment tools should be used with the strategies. Assessment tools should be saved and a copy stored on COMPASS

8. Assessment data should provide evidence of developing the attributes of the IB learner profile. The assessment process at Mount Eliza SC involves the active participation of students, teachers and parents. They work together to keep each other informed about student progress. The student is at the centre of the process and is actively involved in and takes appropriate responsibility for his/her own assessment. Teachers, students and parents support each other in the on-going assessment process.

Special features of assessment in the Middle Years Programme (MYP):

Future year 7 students: All students enrolled with the college for the following year will sit a Literacy and Numeracy test. This data will be organised and analysed by the Literacy and Numeracy Specialists to begin to build a profile of our incoming cohort of students. This process will enable adequate planning to support the transition of these students into the MESC community.

Year 7-9 students will complete ODT/PAT testing twice per semester. This testing will help teachers make Victorian Curriculum judgements for Semester Reports, particularly in Maths and Global Literacies.

Year 7- 9 Authentic assessment tasks in the MYP are generated by teachers and, where appropriate, students. Objectives for each subject group are identified by the MYP subject group guides and are aligned with the assessment criteria. Assessments are measured by criterion-related rubrics that are also found in the MYP subject group guides; these are modified with task-specific clarifications where appropriate. The rubrics describe eight levels of competency against the objectives. Judgments are made by consulting the levels of achievement and assigning the level that best describes the quality of work submitted. Assessment in the MYP is on-going, using both formative assessments (which inform teaching and learning) and summative (which measure the amount of learning that has taken place). This school expects level descriptors for summative tasks to be distributed at least one week in advance of student deadlines. Where appropriate, students are expected to submit the work with a self-assessed judgment based on the level descriptors. Teachers are expected to return student work with written feedback within one **behaviour reporting cycle** of receipt. After

Assessment Policy 2018

a series of judgments are made, the rubrics, along with formative assessment data and summative assessment data are used to make a final judgment using the “best-fit” approach (see pages 78 and 83 of *MYP: From principles into practice*, 2014). The final grade is based on the total of the four criteria along the following grade boundaries:

Grade Boundary guidelines Descriptors:

1 **1–5** Produces work of very limited quality. Conveys many significant misunderstandings or lacks understanding of most concepts and skills. Very rarely demonstrates critical or creative thinking. Very inflexible, rarely using knowledge or skills.

2 **6–9** Produces work of limited quality. Expresses misunderstandings or significant gaps in understanding for many concepts and contexts. Infrequently demonstrates critical or creative thinking. Generally inflexible in the use of knowledge and skills, infrequently applying knowledge and skills.

3 **10–14** Produces work of an acceptable quality. Communicates basic understanding of many concepts and contexts, with occasionally significant misunderstandings or gaps. Begins to demonstrate some basic critical and creative thinking. Is often inflexible in the use of knowledge and skills, requiring support even in familiar classroom situations.

4 **15–18** Produces good-quality work. Communicates basic understanding of most concepts and contexts with few misunderstandings and minor gaps. Often demonstrates basic critical and creative thinking. Uses knowledge and skills with some flexibility in familiar classroom situations, but requires support in unfamiliar situations.

5 **19–23** Produces generally high-quality work. Communicates secure understanding of concepts and contexts. Demonstrates critical and creative thinking, sometimes with sophistication. Uses knowledge and skills in familiar classroom and real-world situations, and, with support, some unfamiliar real-world situations.

6 **24–27** Produces high-quality, occasionally innovative work. Communicates extensive understanding of concepts and contexts. Demonstrates critical and creative thinking, frequently with sophistication. Uses knowledge and skills in familiar and unfamiliar classroom and real-world situations, often with independence.

7 **28–32** Produces high-quality, frequently innovative work. Communicates comprehensive, nuanced understanding of concepts and contexts. Consistently demonstrates sophisticated critical and creative thinking. Frequently transfers knowledge and skills with independence and expertise in a variety of complex classroom and real-world situations. (Source: *MYP: From principles into practice*, 2014, page 93)

Students wishing to enter a VCE Maths program

All students in the college that wish to enter into a VCE maths subject, will undergo testing to determine which stream is best fit for the individual. The Numeracy specialist and Senior Pathways Educational Leader will allocate students accordingly.

Internal moderation in MYP – in the cases where more than one teacher are teaching the same subject group in a given year level, instances of internal moderation will take place for all CATs to ensure a common understanding of criteria and application of levels of achievement. Assessment Panel of the Community project will also moderate. According to the guide *MYP: From principles into practice* (2014): “Standardization throughout the school year promotes consistency and builds common understandings about student achievement with respect to MYP objectives.” (page 83).

Relationship of IB assessment principles and practices with required systems for grading and reporting

ACER/ONDEMAND/PAT testing

As a means of cross-referencing our internal assessment data with National and State standards (**Victorian Curriculum Framework**), students Year 7 through 9 take the ODT test. This test assesses literacy and numeracy for students in many school settings and gives valuable information on student ability. Parents receive a personalised report that indicates how their child is performing against age-appropriate criteria (criterion-referenced) and where they stand relative to all other students.

Documentation used for the purpose of on-going assessment (formative assessment):

Portfolios Rationale: “A portfolio is a record of students’ involvement in learning which is designed to demonstrate success, growth, high-order thinking, creativity, assessment strategies and reflection. A portfolio is a celebration of an active mind at work”. This folio will be important for students to maintain and present at Student Conferences. (*Making the PYP happen: A curriculum framework for international primary education* 2007, page 50)

What does a portfolio include?

As a holistic assessment tool, the portfolio must include contributions from all areas of a student’s school life. The minimum agreements are detailed in the Essential Agreement relating to Portfolios and include all areas of the curriculum that are evident in the student’s report. Teachers are responsible for monitoring the student portfolio content, for both the teacher-selected and student-selected entries.

What will accompany the selected pieces of work?

- All the work in a student portfolio should be annotated with either a teacher or student reflection stating what the work shows and why/how it was chosen. A reference date or description can be made if this feedback is on COMPASS/ManageBac
- Both the teacher and the student (according to age/stage of development) are responsible for regular additions to and revision of the portfolio. Portfolio work must be an integral part of the 5 weekly report cycle so that the value of the portfolio is recognized by all concerned.
- The student portfolio should include self-, peer- and teacher assessments. The work samples should include both draft and final copy, student reflections and samples that show growth/progress/development over time.
- Teacher considers incorporating the IB learner profile and essential elements into the student’s portfolio.

How do we select the entries?

- Portfolio selection can take place in a variety of ways. The student can, at any time, ask to add a piece of work to his/ her portfolio. Likewise the teacher can, at any time, ask the student to add a piece of work to his/ her portfolio.
- It is important to ensure that draft pieces and final pieces that demonstrate the process of learning are included.

Assessment Policy 2018

- The most appropriate way in which work will initially be collected and later be presented in the portfolios will vary from one classroom to another. Students at each year level should use the same format for their portfolios to give some consistency across the year levels.

How do we reflect?

- Student/teacher reflection needs to accompany each work sample. There should be a balance between student/teacher reflections about the samples in the portfolio.
- It is important to encourage student ownership of the portfolio. The more the student can discuss his/her progress in the portfolio, the richer their reflections.
- Peer assessment may be used but needs to be helpful and purposeful.
- Parent reflections may be added in student-led conferences.

Other formative assessment tools and strategies

The following is a list of some assessment tools and strategies which teacher and students may choose from, to include in the portfolio, to assist in demonstrating student learning and development: Strategies Tools Observations Rubrics Performance assessments Exemplars Process-focused assessments Checklists Selected responses Anecdotal records Open-ended tasks Continuums

Documentation used for the purpose of summative assessment

Summative assessment task Any assessment task that can make valid and reliable judgments on student learning can and will be used.

Such assessment tasks include, but are not limited to:

- Formal essays
- Photo essays
- Academic investigations
- Scientific experiments
- Presentations
- Projects
- Website development
- Speeches
- Performances
- Problem-solving
- Design
- Planning

Assessment Policy 2018

- Organization
- Debates
- Journals
- Competitions
- Proposals

Reporting

How do we report student learning? There are a variety of methods employed at Mount Eliza SC for reporting. These include:

Learning Behaviour Reports every 5 weeks (not including cycle of Semester Reports) These reports give students and parents an indication of how students are conducting themselves in the classroom and with their learning in and out of the classroom.

Semester reports A Semester One and Two report shows the progress in all areas of the curriculum. A grade is given on the learner's progress with a Victorian Curriculum grade and IB description of skill attainment.

Student-led conferences – Parents and students receive academic and learning behaviour reports consistently through the year, parents should have a clear understanding of 'where' their student is at compared to peers the same age.

What are 'student-led conferences'?

The ability to 'lead' the conference depends in the student's age, ability and past experience, however the goal is to increasingly develop each student's ability to confidently discuss themselves and their work in an honest and open manner.

Why use student-led conferences? 'Conferencing' as an assessment and reporting tool is an expression of a fundamental belief that students can and should reflect upon and share responsibility for their own learning. It also communicates to the whole school community that we value the students in the assessment process by placing them at the very centre of their own learning and assessment.

- Conferences help develop constructive and open relationships and communication between students, parents and teachers.
- Conferences offer students, teacher and parents the opportunity to reach mutual understanding of the nature of the work completed and the progress it indicates.

Assessment Policy 2018

- Conferences validate student learning and allow for discussion and explanation of individual achievements in a personal setting.
- Through focusing on student work and analysing what it demonstrates about the student as a learner, students, teachers and parents are provided with an opportunity to address specific issues.
- Honest and open discussion, focusing on evidence of student learning, allows opportunities for students, teachers and parents to collaborate in making plans for the future and to provide encouragement for the student as he/she continues to learn.

How do we use student-led conferences? The portfolio and any other significant and relevant student work provide the focus for the student-led conference.

- The teacher welcomes the student and his/her parents to the classroom as they arrive and provides the student with the opportunity to talk with their parents.
- The student initiates the conference
- The student and parents sit at a desk and take time to look through the portfolio and discuss the work included there and the formal teacher assessments and evaluations.
- Parents are encouraged to ask questions which will assist them in gaining information about the extent to which their child understands the purpose of the learning.
- Teacher's role is to assist the student with planning the conference. Then to assist the student as needed.

Evidence of application of the assessment policy in teachers, students and parents

This will be evident when teachers:

- Plan with assessment as the focus of the teaching and learning in their classroom.
- Value and promote assessment as an integral part of the learning process in the classroom with their students.
- Allow their students time to reflect on their own learning as part of the teaching and learning process.
- Model the habit of reflection with their students.
- Provide students with the skills and tools to evaluate their own learning and provide time and support for this in the classroom.
- Adapt their teaching and the learning environment to cater for all student learning styles.

Assessment Policy 2018

- Provide students with the learning expectations or assessment criteria prior to a particular task.
- Identify the extent to which the learning expectations or assessment criteria are met by an individual student.
- Select from a wide range of assessment tools, reflecting student needs and skills.
- Provide students with regular opportunities to share the outcomes of their learning experiences with others, including peers, teachers and parents.
- Communicate clearly and openly with students and parents about, achievements, on-going progress and future goals.

This will be evident when students: (as appropriate and applicable)

- Participate meaningfully in assessing and evaluating their own learning.
- Become aware of their own strengths and weaknesses.
- Become aware of their own learning style.
- Contribute actively to the setting of goals designed to focus on developing their performance in areas of both strength and weakness.
- Are aware of, use and develop a range of assessment tools.
- Share the outcomes of their learning with peers, teachers and parents.
- Contribute to the assessment process through managing their own portfolios.
- Select and reflect on the work put into their portfolios.
- Know what the expectations are for their work and behaviour at school.
- Recognize and increasingly use the common assessment vocabulary used throughout the school.
- Prepare for and lead their conferences with parents and teachers, describing their own learning and explaining the purpose behind the activities they have been engaged in.

This will be evident when parents:

Assessment Policy 2018

- Are informed about the school-based expectations.
- Understand the assessment vocabulary used in the school.
- Recognise that their child is at the centre of the assessment process.

- Value that their child is aware of his/her own strengths, weaknesses, learning styles and preferences.
- Are invited to provide information to the teacher regarding their child's on-going learning
